

**STEREO**  
NEVER STOP SKIING

LOOKBOOK W24/25

#### NORWEGIAN SKI HERITAGE

Norway is the homeland for the originators of the sport of skiing – and is still the optimal location for developing the art of modern skiing. We use the Norwegian ski heritage, mountains and ski spirit to push the development of new innovations towards our goal of making the most outstanding and sustainable skis in the world.

Designed in Norway – Made in Scandinavia

#### PRODUCED WITH RENEWABLE ENERGY

We use the highest quality and most ecofriendly materials in the industry, combined with Scandinavian handcraft. Our aim is to achieve the highest possible ski performance and long lasting products.

The entire production process is powered by 100 % renewable energy.

# W24/25 Collection overview

## THE RACING COLLECTION

Pure FIS race skis made together with no other than one of the most iconic ski racers of all time, Kjetil André Aamodt. The Race Collection has FIS SL and GS skis plus two Race Carve models with full race DNA, all made in Italy.

## THE PISTE COLLECTION

Embrace the finest edge feel and immaculate grip on piste, married to modern shapes and finely tuned flex patterns. From our Norwegian Olympic ski legends designed for the discerning skier for their alpine setup.

## THE FREERIDE COLLECTION

The world's iconic off-piste destinations beg for the best tools available. By blending the finest materials with cutting edge shapes and flawless design, Stereo freeride skis bring something new and different to your feet.

## THE TOURING COLLECTION

Your ideal mixed-use touring partner, Stereo touring skis benefit from our alpine oriented shapes in a light weight yet smooth package. The construction of this collection is equally suited to lift-served and human-powered activities, and pairs well with fully featured tech binding and hybrid-use boots.

## The **Racing Collection**

The most legendary skier of all time, Kjetil André Aamodt, has joined us in developing our new Race Collection. FIS graded SL- and GS skis can bring Norwegian skis back in the World Cup circus! The FIS SL-model and GS-model are purely made for alpine skiracing with stiffness and other characteristics needed to become the next champion.

The collection also has two pairs of Race Carve skis approved by Kjetil, for skiing when not wearing the race suit. The Race Carve models are named RC and GS. These skis are made with the same type of construction, but has sidecuts and flex patterns more suited for everyday skiing - perhaps with the highest degree of race feel on the market.

# FIS Race SL

New for 23/24

Pure FIS graded SL race ski.

Top shelf materials in the most rigid dimensions for optimal race performance. Finetuned by Kjetil and our test team to beat and get the split seconds on your side.

- ✓ Sandwich Construction
- ✓ Ash / Poplar Wood core
- ✓ Full Width Titanal Construction
- ✓ Graphite Race base
- ✓ World Cup Edge
- ✓ Vulcanized Rubber Dampening
- ✓ Anti Scratch
- ✓ Camber
- ✓ Made in Italy

Size	Width	Turn Radius
165	116,4-65-100,7	14,0 m
155	115-65-97	12,5 m

# FIS Race GS

New for 23/24

Pure FIS graded GS race ski.

Top shelf materials in the most rigid dimensions for optimal race performance. Finetuned by Kjetil and our test team to beat and get the split seconds on your side.

- ✓ Sandwich Construction
- ✓ Ash / Poplar Wood core
- ✓ Phenol Sidewall
- ✓ Full Width Titanal Construction
- ✓ Graphite Race base
- ✓ World Cup Edge
- ✓ Anti Scratch
- ✓ Vulcanized Rubber Dampening
- ✓ Camber
- ✓ Made in Italy

Size	Width	Turn Radius
193	FIS	30,0 m
188	FIS	30,0 m

# Race Carve RC

Pure race DNA adopted for G-Force turns.

RC – means Race Carve and is made for the pleasure of g-force turns. The 166 model has a slalom style turn radius of 13,5 meters, while the longer skis have a slightly longer turn radius for larger turns. Pure World Cup construction tuned for the pleasure of skiing.

- ✓ Sandwich Construction
- ✓ Ash / Poplar Wood core
- ✓ Phenol Sidewall
- ✓ Full Width Titanal Construction
- ✓ Graphite Race base
- ✓ World Cup Edge
- ✓ Anti Scratch
- ✓ Vulcanized Rubber Dampening
- ✓ Camber

## The **Freeride** Collection

Through extensive testing and design iteration, Stereo's new Freeride construction elevates what is possible. Ultra high quality sustainable grown wood cores, prepreg composites, and titanal laminate ensure that you make the most of every turn off-piste.

As the metal laminate ski that bridges the gap between all-mountain and freeride, the metal laminate Apex V3 is

incredibly smooth and responsive in all snow conditions. The 108mm wide Zenith V4 has deeper rocker tip and tail, it saves weight by omitting the metal laminates, and has a smooth yet surfy feeling overall. The widest ski we make, the 115mm wide Fram, is a pure freeride ski with excellent float, quick pivots, and endless drifts. It is specially designed for the deepest snowpacks in the world.

# Apex V4

## Maximum Versatility.

Truly the every day big mountain weapon, the Apex is built to excel in every condition. Titanal laminates and beech core bring unflappable stability at speed, while progressive shaping ensures maneuverable handling in all snow conditions, from the deepest to the firmest.

- ✓ Dual Titanal Plates
- ✓ Aviation Grade Prepreg Laminates
- ✓ Beech / Poplar Wood Core
- ✓ Sandwich Construction
- ✓ Semi-Cap
- ✓ Sintered Base
- ✓ Elliptical Tip Rocker
- ✓ Center Camber

Size	Width	Turn Radius	Weight
186	130-100-118	19,5 m	2050 gr
178	127-98-115	19,1 m	1890 gr
170	124-96-113	18,7 m	1820 gr

# Zenith V4

## Playful Stability.

A true freeride ski, the Zenith adds waist-width and tail rocker to offer more float in untracked and soft snow, while maintaining low camber and precise edge grip to ensure that the Zenith is always “the right ski for the day”.

- ✓ Tri-Axial Fiberglass Layup
- ✓ Carbon Stringer
- ✓ Aviation Grade Prepreg Laminates
- ✓ Beech / Poplar Wood Core
- ✓ Sandwich Construction
- ✓ Semi-Cap
- ✓ Sintered Base
- ✓ Elliptical Tip Rocker
- ✓ Center Camber

Size	Width	Turn Radius	Weight
188	137-108-126	20,0 m	1970 gr
183	135-107-125	19,5 m	1900 gr
179	134-105-123	19,3 m	1840 gr

# Fram V3

## Surfy Floatation.

For the best days of your life, there is no better partner than the elliptical rocker, responsive quickness, and surfy feel of the Fram V3. Thanks to a carbon hybrid layup, it is both easy to ski and highly stable at speed. The Fram makes your best days even better.

- ✓ Tri-Axial Fiberglass Layup
- ✓ Hybrid Carbon Fiberglass
- ✓ Aviation Grade Prepreg Laminates
- ✓ Karuba / Poplar Wood Core
- ✓ Sandwich Construction
- ✓ Semi-Cap
- ✓ Sintered Base
- ✓ Elliptical Tip Rocker
- ✓ Zero Camber

Size	Width	Turn Radius	Weight
187	140-115-126	23,0 m	1790 gr

## The **Touring Collection**

As the fifth generation of ski touring construction, no other ski in the weight class delivers the smooth and refined feeling as the Stereo Mk5. Made in a solid and lightweight hybrid construction, these skis are light and versatile, suited for ski touring on wide variety of backcountry snow conditions.

As the narrowest ski in the range, the 88mm wide Wolverine Mk5 is the fastest ski in the skin track and most efficient tool to cover distance and vertical, all while capturing optimal ski performance on the descent. The 100mm Lynx Mk5 is the ultimate blend of versatility from deep power to spring corn. The widest touring ski in the line is the 108mm Wolf Mk5, featuring a fully rockered shape and surfy demeanor.

# Lynx MK 5

## Everyday Anywhere.

Always the right tool for the job, the Lynx features elliptical tip rocker, incredibly smooth ride for it's weight, and perfectly suited for satisfying turns, no matter if a lift is involved or not. The most versatile touring ski in our range.

- ✓ Tri-Axial Fiberglass Layup
- ✓ Carbon Stringer
- ✓ Lightweight
- ✓ Aviation Grade Prepreg Laminates
- ✓ Karuba / Poplar Wood Core
- ✓ Sandwich Construction
- ✓ Semi-Cap
- ✓ Sintered Base
- ✓ Elliptical Tip Rocker
- ✓ Center Camber

Size	Width	Turn Radius	Weight
186	130-100-118	19,5 m	1610 gr
178	127-98-115	19,1 m	1570 gr
170	124-96-113	18,7 m	1395 gr

# Wolf MK 5

## Deep Snow Assassin.

Adventures in the best mountains and skiing the best snow deserve the most progressive touring skis. The Wolf adds float to make the most of untracked snow, and careful construction ensures stability the days after a storm.

- ✓ Tri-Axial Fiberglass Layup
- ✓ Carbon Stringer
- ✓ Lightweight
- ✓ Aviation Grade Prepreg Laminates

## Stereo Tech bindings

Italian ATK is a market leader in tech binding. We are introduced bindings in collaboration with ATK for maximum performance when matched with our touring skis.

# Stereo ATK R12 AP

## Free Touring Performance

Weighing a record 305 gr with carbon fiber composite toe piece: completing the Free Touring range and providing top quality performance. The fully-adjustable Freeride Spacer (cod: AL09) is available as an optional.

**Materials:** Alu 7075, Stainless Steel, POM, 30% Carbon fiber

**Walking modes:** Flat, +32 mm, + 37 mm, +46 mm, +52 mm

**Release:** 5-12

**Weight:** 305 grams

**Brake width:** 86 mm, 97 mm, 108mm

# Stereo ATK R13 EVO

## Outstanding Performance

The Raider Evo range is completely redesigned and features a new series of bindings which display the best of ATK Bindings' technology applied to the Free Touring category. Raider 13 Evo are not just bindings, they are a work of art by ATK Bindings: a futuristic design for outstanding performances.

**Materials:** Alu 7075, POM, Stainless steel

**Walking modes:** Flat, +35 mm, +49 mm

**Release:** 5-13

**Weight:** 370 grams

**Brake width:** 86 mm, 97 mm, 108 mm

Accessories

# Freeride Touring Pole

C7 titanal and carbon fiber.

The perfect compliment, the Lightweight and adjustable freeride poles are made from C7 titanal and carbon fiber for strength and durability.

One size / Weight: 200 grams
